1. (S/NF/SK) TASKING:: The Interviewer was cognizant of the true purpose of the site, the [REDACTED] NY. The actual target within the facility was selected just

SG1A

[REDACTED] was decided upon from discussion concerning, "what would set an [REDACTED] apart from any other similar type corporate headquarters?" The existence of [REDACTED] was chosen by the Interviewer. Prior to the session, the Source was provided several key phrases and descriptives provided by Her during previous sessions and told that this would be the final session concerning this target. During this session, Source was provided the same encrypted coordinates as the previous session, (255700/548156), as per Extended Remote Viewing protocols, this preventing inadvertent geographic cuing. No other cuing or descriptive data except that discussed above was provided to the Source pertaining to this site.

2. (C/NF/SK) SESSION: There were no unusual occurrences, inclemencies or external environmental conditions known to the Interviewer which may have influenced the results of this session. This session was conducted entirely utilizing ERV protocols.

3. (S/NF/SK) SUMMARY:

a. (S/NF/SK) The following narrative contained within quotation parks is an abridged version of Source's post-session written summary. This summary has been editorialized, (as indicated), by the undersigned, for clarity, grammar and

structure. The actual unabridged summary is maintained in the mission field dossier at this location along with any other material produced during the session, i.e., sketches, notes, etc. BEGIN NARRATIVE: "At first I saw the structure from behind and entered the first floor. It was extremely crowded and noisy (in this area). I then went to the special area and felt that I walked through big arches and entered a hall and then a room. The room seemed small at first with only a big desk, a drawing board and another desk (located in the room). I kept sensing a filing system and containers (for) storing. I then felt that the area was bigger (than before) and I could sense men working in a rounded (shaped) area with (containing) tables that were smaller, lighter and more modern (than other tables in the building). The area was old but the desks were modern. I then went to a man talked to him. I asked him what went on (in this building) and got (an impression) of observing. Also I saw large groupings of numbers and these numbers were associated with people's names. (The) name and numbers, long numbers, (are) part of a protection".

b. (S/NF/SK) During the actual session, Source reported other data which may impact on the final assessment of this target. That data is listed below in raw unevaluated form:

(1) (S/NF/SK) Source reported on one, "Special Area" where access is restricted or as reported by Source, "you have to be accepted to be here". This area appeared to be utilized to store papers or documents, i.e., "papers not out, hidden, (some) papers that can be picked up from the table, OK to be left out, (an) area for reading to gain knowledge, holding containers, (for) filing paper material, a storage area."

(2) (S/NF/SK) In another, "Special Area", Source reported "things" being, "logged in, timing (is important), the writing is different, numbers, groupings of numbers, long numbers (which) are part of a system, part of (the) protection, names for numbers, hiding, blocking, concealing..."

4. (S/NF/SK) OPS FEEDBACK: This was the final session of this series of repeated targetings. Source, as expected had some early difficulties in separating AOL drive from fleeting images but as the sessions continued, so to, did Her expertise. This final session was designed to positively identify some aspect of this structure which would set it apart from any similar "IBM" type corporate headquarters. It was planned to have the Source seek out the [REDACTED] but, as often occurs in the Remote Viewing technology, the Source answered the real Intelligence question without spending any effort on locating the target as proposed by the Interviewer. That is to say, instead of locating physical equipment [REDACTED] the Source went to the classified vaults and the code rooms to

demonstrate the real difference between this building, [REDACTED] facility, and any other similar corporate type structure. It is the opinion of this Interviewer that this Source has successfully demonstrate her ability to handle full operational missions.
